

UPS Solutions for Industrial & Manufacturing

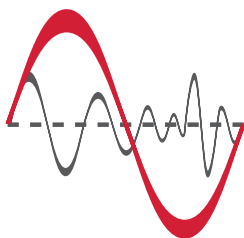

1,300+ Units Installed • 325+ Customers • 44+ Countries

Selected by industry leaders around the world

Active Power's CleanSource® UPS, PowerHouse®, and modular IT systems have a proven track record of solving the most important power problems facing industrial and manufacturing facilities. Our customers use our products to support critical production operations around the world. Active Power's solutions protect against all power quality issues, eliminate costly downtime, and integrate with your existing operations.

Power Quality

Protects

Protects against all power quality issues

Reliability

Saves

Eliminates the costs associated with downtime and necessary clean-up

Integration

Integrates

A great fit to integrate into your operations and achieve your goals

Customer Case Studies

Customer: Pemex Refinación | Mexico
Need: Reliable, quality power for pumping equipment
Solution: 20+MW of Active Power CleanSource UPS Systems
Key Drivers: Power conditioning, reliability

"The lack of consistent and reliable power to support our operations was an ever present management headache before we installed CleanSource UPS. Since installation, we are very pleased with the improvement in our day-to-day operations."

– Mauro Caceres, General Superintendent, Operations

Customer: Stratasys Direct Manufacturing | Texas
Need: Reliable critical backup power solution
Solution: Active Power CleanSource UPS system
Key Drivers: Reliability

"Our Active Power flywheel UPS has performed flawlessly. We once experienced 10 power drops – one lasting 30 seconds – in a 30- minute time frame and the flywheel kept our machines running smoothly."

– Greg Reynolds, VP of Additive Manufacturing

Our Products

CleanSource® XT250 UPS

250 kW - 1.75 MW

- Delivers highly efficient and reliable backup power in a compact footprint
- Parallelable for multi-megawatt solutions
- Extended ride-through time

CleanSource MMS UPS

250 kW - 7 MW

- Delivers highly efficient and reliable backup power in a compact footprint
- Parallelable for multi-megawatt solutions

CleanSource HD675 UPS

675 kW - 4.725 MW

- Delivers 40% TCO savings, is 12x less likely, and reduces carbon emissions by 90%

CleanSource DC

250 kW - 2 MW

- Supplements or replaces battery strings in UPS systems, driving down lifecycle cost while improving reliability

PowerHouse®

Complete Modular Power Systems

- Factory built and tested for low cost, rapid deployment
- Superior management capability

Services

- Design engineering and project management
