

There are moments when you don't want the lights to go out

As subsidiary of the international engineering enterprise Langley Holdings plc Piller provides client-specific system solution: high-quality energy conditioning, uninterruptible power supply as well as frequency modulation. We have established as the first ones address in the market particularly with the customers, who are absolutely dependent on power – like banks, airports or hospitals.

For our international business in Finland we are looking to fill the following vacancy:

Service Technician (f/m/d)

Your role

- Implement, maintain and repair Piller systems in Finland and the rest of Scandinavia
- Occasional site management during service jobs
- Support in planning and implementing service jobs
- Produce timely and detailed service reports
- Cooperate with technical team and share information across the organisation
- Providing advice and trouble-shooting for our customers
- Build positive relationships with customers

Our requirements

- Educated as an electronic or electrical engineer
- Professional experience in service of electronic regulated units and systems
- Extensive knowledge of the English language (or German)
- Good knowledge in MS Office and PC handling
- Willingness to travel
- Customer focussed
- High degree of team spirit and flexibility
- Independent and goal-oriented and responsible working style
- Your residence should be near Helsinki

Piller offers it's employees a modern working area, a host of opportunities for further development and collaboration in a friendly and inspired Team. We assist our employees with the balancing act between private life and the exciting challenges at Piller. In addition to your tools and measuring instruments, we also provide you with a company car, laptop and mobile phone.

Do you have enough power? If you would like to join our team, please submit your application and CV to the address or by e-mail below.
